## OTHER HAZARDS AFFECTING LAND AREAS

CALOY is unlikely to directly affect the country throughout the forecast period.

## HAZARDS AFFECTING COASTAL WATERS

**24-Hour Sea Condition Outlook**

**Up to moderate seas over the following coastal waters:**

- **Up to 2.5 m:** The eastern seaboards of Northern Samar, Eastern Samar, and Siargao-Bucas Grande Islands; the seaboards of Batanes; the western seaboard of Babuyan Islands; the northwestern seaboard of Ilocos Norte.
- **Up to 2.0 m:** The remaining seaboards of Ilocos Norte and Babuyan Islands; the eastern seaboards of Cagayan, Isabela, Camarines Norte, Catanduanes, Albay, Sorsogon, Dinagat Islands, Surigao del Sur, and Davao Oriental; the northern seaboards of Camarines Sur, Catanduanes, and Northern Samar.
- **Mariners of montorbancas and similarly vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

## TRACK AND INTENSITY OUTLOOK

- Tropical Storm CALOY will continue moving west northwestward throughout the forecast period and will remain over the Philippine Sea, far from the Philippine landmass.
- In the next 12 hours, CALOY may maintain its strength. Weakening trend will likely begin tomorrow (10 May) evening. It is forecast to weaken into a tropical depression by tomorrow evening and further weakening into a remnant low on Monday (11 May).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
